

Terms and Conditions (Acceptable Use)

Incident Log

These terms and conditions detail how Incident Log can be used once purchased. They do NOT provide proof of purchase, your licence agreement with activation key provides you with proof of purchase.

Once purchased, Incident Log can be used on an unlimited number of computers within the purchasing establishment providing the computers are owned by the purchasing establishment and the software is used on behalf of the purchasing establishment.

Incident Log is designed to be used to collect information about pupil incidents within school, therefore, the main installation needs to be carried out on a single computer as this will become the computer where the central information is stored ("Server"). For schools with a server we recommend the main Incident Log installation is carried out on your server. Once the main installation is done the workstation installation can be installed to an unlimited number of computers however they need to be able to access the server via a network in order for Incident Log to run.

To ensure the data entered into Incident Log is kept safe there is a restriction in place to ensure Incident Log is only run from one computer at a time. This step is crucial in order to provide data integrity and ensure data corruption does not occur.

Please refer to the Incident Log user guide for more detailed information about the installation process. Please contact Bransoft should you require any further information.

Signed on behalf of Bransoft Ltd

A handwritten signature in blue ink that reads "SABrannan". The signature is written in a cursive style and is contained within a light blue rectangular box.
