

Terms and Conditions (Acceptable Use)

IT Budget

These terms and conditions detail how IT Budget can be used once purchased. They do NOT provide proof of purchase, your licence agreement with activation key provides you with proof of purchase.

Once purchased, IT Budget can be used on an unlimited number of computers within the purchasing establishment providing the computers are owned by the purchasing establishment and the software is used on behalf of the purchasing establishment.

IT Budget is designed to be used to collect information about your IT budget within school, therefore, the main installation needs to be carried out on a single computer as this will become the computer where the central information is stored ("Server"). This can either be done on a server or any other computer such as laptop that the IT co-ordinator has access to. Once the main installation is done the workstation installation can, if required, be installed to an unlimited number of computers however they need to be able to access the server via a network in order for IT Budget to run.

To ensure the data entered into IT Budget is kept safe there is a restriction in place to ensure IT Budget is only run from one computer at a time. This step is crucial in order to provide data integrity and ensure data corruption does not occur.

Please refer to the IT Budget user guide for more detailed information about the installation process. Please contact Bransoft should you require any further information.

Signed on behalf of Bransoft Ltd

A handwritten signature in blue ink that reads "SABrannan". The signature is written in a cursive, slightly slanted style.
